

## Civil Engineer

### Job Description:

We are seeking a skilled civil engineer to join our team and contribute to the design, management, and construction of infrastructure projects. The ideal candidate will have experience in designing roads, bridges, water supply systems, and other infrastructure projects, as well as managing projects from conception to completion.

### Responsibilities:

- Develop project plans and budgets in collaboration with stakeholders.
- Utilize industry-standard software tools to design infrastructure projects.
- Ensure compliance with local and national regulations and standards.
- Conduct structural analysis using software tools to ensure the safety and reliability of infrastructure projects.
- Manage project timelines and budgets, and communicate progress to stakeholders.
- Provide technical support to construction teams during the construction phase of projects.
- Review and approve project deliverables, including drawings, specifications, and reports.
- Conduct field surveys and collect data to support infrastructure project design.

### Requirements:

- Bachelor's or Master's degree in civil engineering or a related field.
- Professional Engineer (PE) license preferred.
- 5+ years of experience in designing and managing infrastructure projects.
- Proficient in AutoCAD, Revit, Civil 3D, SAP2000, and other industry-standard software tools.
- Knowledge of local and national regulations and standards.
- Strong analytical and problem-solving skills.
- Excellent communication and interpersonal skills.
- Ability to work independently and as part of a team.

If you are a skilled civil engineer with a passion for delivering sustainable and efficient engineering solutions, we encourage you to apply for this exciting opportunity
